

Position Title: Exercise Physiologist

Employer: Move Health Services Pty Ltd

Job Start date: immediate

Salary: Negotiable salary or % fee split

Location: We have positions at our clinics in: New Farm, Brisbane CBD and Alexandra Hills Hills

Accreditation type: Exercise Physiologist.

Application closing date: 14/2/2018

Work Type: FT, PT & Contractor

About Us:

MOVE is a busy Allied Health Care clinic in Brisbane delivering an integrated solution to musculoskeletal pain and rehabilitation.

MOVE started in 2004 and has grown from being an Osteopathy only service to a multi-modal solution that now includes Osteopathy, Clinical Pilates, Physiotherapy, Exercise Physiology, Myotherapy, Remedial Massage and Acupuncture. We have accumulated over 60,000 patient files and currently complete around 3000 consults per month.

We have a Pilates studio with reformers, wunda chair, mats, balls etc and a separate rehab gym with power rack, dumbbells, kettle bells, balls, bands etc

Owners, Dr Kellie Rawlings and Dr Giulian Di Venuto both graduated from the Victoria University Osteopathic Medicine program in 2002 and 2003 respectively. Both have lectured at University level teaching clinical sciences, clinical diagnosis, patient management and manual therapy.

With 30 years of clinical experience between them, Giulian and Kellie have put together a structured mentoring program to specifically 'fast track' the development of patient management skills, clinical communication and to facilitate a multi modal solution to musculoskeletal pain and dysfunction where active, exercise based care is central.

About you:

You really love your work and it is important to you to not only achieve outstanding results but to create a memorable and outstanding client experience.

You are passionate about pain management, musculoskeletal rehabilitation and performance optimisation through movement and exercise.

You are keen to develop your patient management skills and value working along side manual therapists within a team care environment to achieve optimal patient outcomes.

Pilates reformer method training would be ideal but not necessary to apply.
